/ EDUCATION

Thapar Institute of Engineering & Technology

- B.E. Electrical Engineering
 - Technical Lead @ Entrepreneurship Development Cell, TIET
 - [Specialization in Blockchain](#)
 - [Smart Contract Security](#)
 - [Financial Markets](#)

/ TECH STACK

- Typescript
- NodeJS
- Solidity
- Rust
- Common web3 libraries like ethers, viem, foundry
- Cloud

/ Work Experience

>> **Gnosis**

Developer Relations Manager (Sep '24 - Present)

- Actively built developer starter kits like [Gnosis Dapp Boilerplate](#) and [Circles CLI](#).
- Built and managed a suite of internal tools to extend the functionalities of various Gnosis products.
- Primary maintainer of all developer documentation and content.

>> **Shardeum**

Developer Relations Manager (Jan '24 - Sep '24)

Developer Relations Engineer (Dec '22 - Dec '23)

- Defined the Developer Relations strategy and go-to-market plan for the testnet product.
- Rebuilt the entire [documentation platform](#).
- Led workshops in hackathons and maintained developer documentation, including boilerplate repos and dapp examples.
- Collaborated with internal engineering teams and external partners to identify breaking changes and bug-reporting.

>> **Polygon**

Developer Evangelist (June 2021- Dec 2022)

- Helped build a developer relations team from scratch (2nd hire in the Polygon DevRel team).
- Led multiple hackathons, developer conferences and bootcamps with external partners.
- Lead organizer of [Polygon BUIDL IT hackathon](#). With over 5000+ registrations and 300 projects, it became India's biggest web3 hackathon ever.
- Coordinated with web3 dev hubs like Encode Club, EthGlobal, Buildspace, Pointer.GG to drive high impact events and onboard devs to the Polygon community.

/ PROJECTS

>> **DefiMoon | Github**

A decentralized covered call options trading platform built on Gnosis Chain, featuring ERC-1155 option tokens and 1inch Limit Order Protocol v4 integration for trustless trading.

>> **LearnRust | Github**

A free, open-source web app for learning Rust from beginner to advanced level

>> **CirclesPay | Github**

Circles Pay lets neighbourhood businesses open a CRC checkout in minutes.

>> **Dapp Boilerplate | Github**

An easy to customizable dapp boilerplate to build Shardeum dapps in hackathons and idea iterations
